JALOVIK ART COLONY

## Insularni postupci

Umetnička kolonija samim nazivom sugeriše na izmeštanje sveta umetnosti iz prvo bitnog saznanjog okruženja, kao što je to slučaj kolonizacije teritorije sela Jalovik njegovim režimom znanja. Zbog činjenice da su prošli kroz akademsko obrazovanje i time stupili u instituciju umetnosti, učesnici su ostvarili pravo i resurse (vreme, produkcijske troškove, energiju) da formiraju i ponude kulturne kodove odnosno da se opredеле između rada (poesis) i/ili političke akcije (praxis). Ove dve vrste delovanja međusobno razlikuju proizvodnja objekta kod prvog i nedostatak proizvodnje objekta kod drugog.\*

Ali, pre nego što odredimo koji umetnički radovi su fokusirani na poetike, a koji na praksu, trebalo bi razumeti da ovogodišnji kolonizatorički čin nije radikalni niti jedinstven već se sastoji iz niza insularnih postupaka koje odlikuje ili umerena osetljivost prema kontekstu delovanja ili njen nedostatak.

Jedan od ciljeva Jalovičke likovne kolonije je već višedecenijsko negovanje lokalne publike iz sela, koja je formirala svoj odnos prema umetnosti zasnovanoj na poetici pre nego na praksama. Ova činjenica prečutno utiče na obavezu da aktuelno polje mogućeg delovanja ostane u domenu poetika koje bi bile čitljive, ali ne nužno i uvek razumljive za publiku. Značaj očekivanja publike istovremeno ukazuje na povratni kolonizatorički proces gde je, tokom kratkog boravka u Jaloviku, naučeno struktuirano znanje teško modifikovati u danas aktivnu kritičku praksu vizuelnih umetnosti.

Odnos učesnika i okruženja je dakle samo relativno kolonizatorički. Taj odnos je komplementaran i smeran istovremeno, jer umetnici pružaju one rezultate na koje misle da je publika tradicionalno navikla. Jedni druge dopunjaju sa onim sastojcima koji su nedostajali i na taj način se stabilizuje postojeći poredak. Svaki radikalni uvod u novi estetski režim može da dovede do prelomnih tačaka pa je kao takav i izbegnut.

Izmeštanje institucije umetnosti, odnosno proširenje zone njene autonomije, najviše je izdraženo u akciji Radoša Antonijevića. Njegova *Berza ideja* korespondira sa vrednostima svojstvenim neoliberalnom kapitalizmu, a njegova nematerijalna praksa pokušaj je promene društvenog okruženja usled promene prakse. Antonijevićev odnos sa publikom i učesnicima je recipročan i omogućava distribuciju moći, jer dozvoljava da se ostvari praksa na način koji stabilizuje odnos. Norvežanka Vigdis Storsveen ostaje u domenu transdisciplinarne prakse umetnosti, biologije i nauke, ukazujući na mikropolitiku kao mogućnost formiranja subjekta – saksijskih biljaka, uz pomoć misaone energije.

Umerena osetljivost prema lokalnom okruženju može se uočiti u radovima Carlosa Carmonamedine, umetnika iz Meksika, koji se već nekoliko godina svojevoljno izmestio u centralnu i istočnu Evropu. To izmeštanje pomoglo mu je da izgradi poetiku zasnovanu na osetljivosti za prepoznavanje i unošenje razlike. U Jaloviku je Carmonamedina napravio idole od sakupljenih suvih stabljika kukuruza i fotografije koje su nastale tako što je noću, na lokalnom groblju, izlagao svetlo dugoj ekspoziciji.

Ispitivanjem forme bavili su se Nemanja Jovičić u tehniči ulja na platnu, Ksenija Pantelić sa linorezima i Selman Trtovac sa crtežima čiji su predložak bili filozofski tekstovi.

Davor Dukić i Ana Krstić, svako u sebi svojstvenom mediju, skulpturi i fotografiji, otvorili su pitanje infantilnog stadijuma i možda indirektne nemogućnosti da miran život palanke omogući potpunu zrelost. Dukić

\* Virno, pozivajući se na Aristotleovu Nikomahovu etiku.

koketirajući sa zlatom kao sa univerzalnim alhemijskim elementom, Krstićeva spajajući popularnu kulturu i seosku decu, tako što ih je preobukla u *Moćne Renžere*, i fotografija kao poetičnog zapisa tog spoja.

Slike Nenada Kostića su predstava krvi na stepeniciama Muzeja moderne umetnosti u Nici čime je ispitao limite institucije zapadnog sveta umetnosti i ukazao na traumu onih izvan institucionalnih okvira. On se bavio indirektnim odnosom margine i centra i reprezentovao je prodror realnog u predvorje institucije umetnosti.

Simptom nemogućnosti integriranja ili artikulisanja sistema u potpunosti, bilo da je u pitanju pozicija kolonizatora ili kolonizovanog, pokazuje iznenadno učešće Virginie Therese Colombe u Koloniji, laika čije spontano napravljeno ulje na vratima, *Samorođenje*, ukazuje na vitalnost nepretencioznog postupka.

U jednoj od budućih kolonija trebalo bi produbiti praksu boravka kustosa/kustoskinje koji bi stimulisali saradnju sa umetnicima na način da se pojedinačna ostvarenja uklapaju u jedinstvenu koncepciju, a sa ciljem otvaranja aktuelnih pitanja koja bi mogla da barem privremeno kritički redefinišu Jalovik.

### ***Insular procedures***

*The name of the art colony suggests displacement of the world of art from its original cognitive environment, as in the case of, colonization of the territory of the village Jalovik with its knowledge regime. Due to the fact that they have undergone the academic training and thus entered the institution of art, the participants could exercise their right and apply resources (time, production expenses, and energy) to formulate and offer cultural codes, that is, to commit themselves to the work (poesis) and/or political action (praxis). Those two types of action are different in terms of the production of object in the former and the lack thereof in the latter.\**

*But, before we decide which works of art are focused on poetics and which on practice, it is necessary to understand that this year's colonizing act is neither radical nor unique, but that it consist of series of insular procedures characterized by either moderate sensibility towards the context of action or its lack.*

*One of the goals of Jalovik Art Colony is to cherish the local village audience, a tradition lasting some decades now, the audience that has established its relation towards the art based on poetics rather than on practice. This fact tacitly imposes the obligation to keep the possible actual field of action within the domain of poetics that was readable but not necessarily understandable for the audience. The importance of the expectations of the audience simultaneously points to the reversible colonizing process where, in the short stay in Jalovik, it was difficult to modify the received structured knowledge into active critical practice of visual arts.*

*The relation of participants and environment is therefore only relatively of a colonizing kind. That relation is complementary and humble, because the artists offer only those results that they think the audience is*

\* Vimo, referring to Aristotle's Nicomachean Ethics

*traditionally used to. They complement each other with those missing elements and thus stabilize the current order of things. Every radical introduction into new esthetic regime can easily reach breaking point and as such should be avoided.*

*Displacement of the institution of art, that is, expansion of the zone of its autonomy, is most obvious in the action of Radoš Antonijević. His Stock Market of Ideas corresponds to values pertaining to neoliberal capitalism, and its non-material practice is an attempt to change social environment on account of the change of practice. The relation of Antonijević with the audience and participants is reciprocal and allows the distribution of power, because it allows the practice to be put in effect in a manner that stabilizes such relation. The Norwegian, Vigdis Storsveen, remains in the domain of transdisciplinary practice of art, biology and science, pointing to micro politics as a way of fashioning of a subject – pot plants, with a help of mental energy.*

*Moderate sensibility towards the local environment can be seen in the works of Carlos Carmonamedina, the artist from Mexico, who has displaced himself voluntarily to central and eastern Europe. This displacement has helped him build poetics based on sensibility for detecting and introducing difference. In Jalovik, Carmonamedina has made idols out of dried stems of corn and photographs created in a way that he has exposed the light at night, to long exposition, on the local cemetery.*

*Those who focused on the exploration of form were Nemanja Jovičić in his technique of oil on canvas. Ksenija Pantelić with linocut and Selman Trtovac with his drawings based on philosophical texts.*

*Each in his own media, sculpture and photography, Davor Dukić and Ana Krstić have opened the question of infantile stadium and maybe indirect impossibility of reaching maturity living a life in province. Dukić by flirting with gold as a universal alchemical element, Krstić by merging pop culture and village children, by means of masking them into Power Rangers and taking photos as a poetic record of this union.*

*Paintings of Nenad Kostić are representation of the blood on the staircase of Museum of Modern Art in Nice by means of which he has explored the boundaries of the institutions of the western world and pointed to the trauma of all those that are outside the institutional boundaries. He dealt with indirect relation between the margin and the centre and presented us with the breakthrough of the real into the vestibule of the institution of art.*

*Symptom of the impossibility to fully integrate and articulate the system, either from the position of colonist or from the position of the colonized, is made obvious by the sudden participation of Virginie Therese Colombe in the Colony as a lay person whose spontaneously created oil on door The Self Birth points to the vitality of unpretentious procedure.*

*In one of future colonies, the practice of hosting a curator should be fostered, in order to stimulate the co-operation with artists as to fit individual works of art into unique concept with a view to opening actual questions capable of critical redefinition of Jalovik on a temporary basis.*

## Berza ideja

Tvoje je samo ono što si dao drugom

- **Slobodna berza ideja** je umetnički projekat čiji je cilj razmena ideja među umetnicima.
- Ideja iz sfere imaginarnog brzo i efikasno prelazi u sferu stvarnog njenom objavom na Berzi.
- Ideje umetnika se upisuju u formular Berze u vidu izjave koju umetnici potvrđuju svojim potpisima.
- Radnik Berze, pečatom berze overava dokument.
- Dokument o razmeni se izdaje u tri primerka, po jedan za svakog umetnika i jedan primerak ostaje na Berzi kao dokumentacija.
- Berza zadržava pravo da prikazuje dokumentaciju u cilju promocije sopstvenog rada.
- Ovom razmenom umetnici se ne održu sopstvene ideje, oni zadržavaju pravo na nju, ali to isto pravo daju i umetniku sa kojim su ideju razmenili.

**Napomena:** Isključivo u okviru Jalovičke likovne kolonije Berza će izdati i četvrti primerak dokumenta o razmeni, i on će ostati u umetničkoj arhivi kolonije.

### Trade Market of Ideas

Yours is only what you give to other

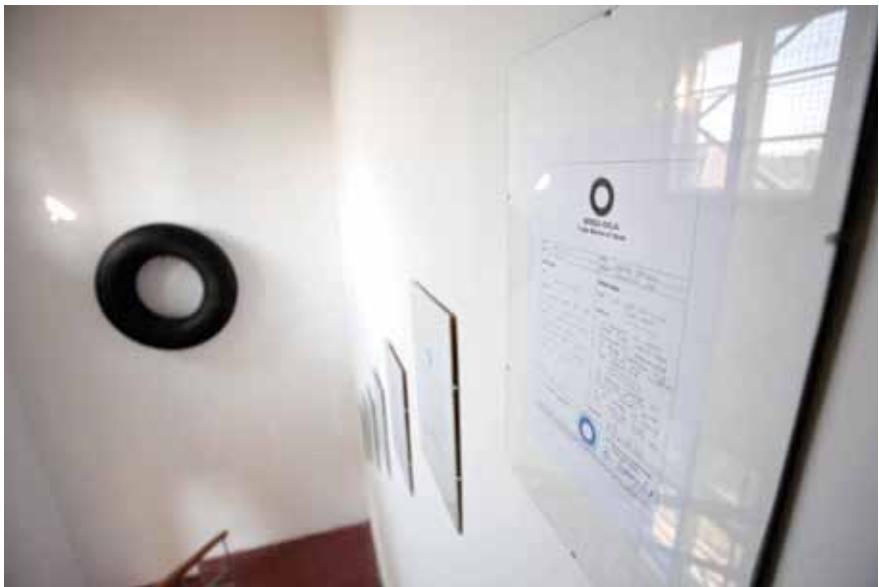

- Trade Market of Ideas is an artistic project which goal is solely exchange of ideas between artists.
- After its placement on the trade market the idea from the sphere of the imaginative quickly and efficiently moves into the sphere of real.
- The Trade market Representative makes the document valid with the stamp of the trade market .
- Three copies are given of the exchange document,one for each artist and one document remains property for the trade market documentation.
- Trade market reserves the right to display the documentation in order to promote their own work.
- With this exchange,the right of the idea of the artist is preserved but also passed on to the exchange artist.

**Attention:** Fourth copy of the document will be made only during Jalovik artist residency and it will remain as property of Jalovik artist residency archive.

Balkan i moj večiti povratak. Tle je živo, prožeto različitim energijama: prekomerna količina kreativnosti i muzikalnosti. Kao i uvek u svom radu, pokušao sam da povežem iskustva sa putovanja sa smrću, humorom i slučajnošću, i Jalovik nije bio izuzetak. Nailazio sam samo na dobra srca i mnoge različite naznake drugih života, drugih svetova. Moja serija dela predstavlja kombinaciju različitih perspektiva o tamnoj materiji, u bliskoj vezi sa seoskim životom u kojem je konцепција vremena potpuno drugačija.

*The Balkans and my ethernal retour. This soil is alive, full of different energies: an overdose of creativity and musicality. As always in my work, I tried to relate my travel experiences with death, humour and accident, and Jalovik was not the exception. There I've found only good hearts and many different traces of another lives, another worlds. My series of works combines several perspectives of dark matters, very related to village life where the conception of time is completely different.*

## Samorođenje

Moj rad istražuje mehanizme ljudskog tela i način na koji se fizički procesi grupišu i samoorganizuju. Koristila sam vrata da reproducujem proces stvaranja kao simbol otvaranja i obnove, ponovnog otkrivanja unutrašnjosti i spoljašnjosti. Takođe sam htela da istaknem mrežu koju sami stvaramo kao inteligentan i logičan sistem i da predstavim njenu shemu kroz rađanje.

### *SelfBirth*

*My work explores the human body mechanisms and how the physical operations get together, how are they self-structured and organized. I used a door to reproduce the process of creation as a symbol of opening and renewing, rediscovering the inside and the outside. I also wanted to emphasize the network of our own construction as an intelligent and logical system and reproduce its scheme through birth.*

Svako je našao svoj ritam stvaranja u Jaloviku. Ja sam voleo da započnem dan branjem šljiva, časkanjem sa cimerima i jutarnjim protezanjem na kamenim skulpturama ispred sale za venčavanje.

Bilo je to deset izuzetno produktivnih dana i imao sam priliku i čast da to vreme delim sa divnim ljudima iz organizacije i prijateljima iz sveta umetnosti. Količina radova koja je nastala tokom Kolonije i energija koja je proizlazila iz našeg druženja, podsetili su me na to koliko je značajno vreme tokom kog mi ne treba da budemo ništa drugo osim umetnika.

A i boćanje je bilo super.

*Each one of us found its own working rhythm in Jalovik. I liked to start the day by picking plums, chatting with roommates and morning hanging by the sculptures in front of the wedding hall.*

*Those were ten extremely productive days and I had an opportunity and honour to share this with wonderful people from the organization and friends from the world of art. The quantity of works that were created during Colony and energy that was generated from our interaction reminded me how important is the time when we do not have to be anything else but artists.*

*And bowling was great too.*

Kao polazište za sliku koju sam uradio u Jalovičkoj likovnoj koloniji, koristio mi je crtež koji sam uradio 2010. godine. Crtež je rađen grafitom na kartonu, dimenzija 100 x 70 cm. Gusto tkanje dobijeno potezima grafitne olovke po površini kartona doprinelo je utisku težine materije crteža.

Na slici sam, zbog mogućnosti koje pruža medij uljane boje (sporo sušenje bojenog sloja, mogućnost pravljenja visoke paste na slici), pokušao da prenesem utisak gustine i težine materije koji je vezan za crtež, a da pritom slika ne bude zapušena i opterećena bojom. Kao rešenje se nametnuo metod bržeg slikanja, u nekoliko navrata, i korišćenje slikarske špahtle, sa kojom se boja može brzo premestiti sa jednog na drugi deo platna. U postupcima nanošenja i skidanja boje, špahtla bi za sobom ostavljala vidljivu strukturu platna, koja, kao kontrast visokoj pasti, učestvuje u građenju ritma slikane površine.

*As the starting point for a painting I created in Jalovik Art Colony, I used my drawing made in 2010. The drawing was done with graffiti on the cardboard, dimensions 100 x 70 cm. Thick textures achieved with strokes of graffiti pen on the surface of the cardboard contributed to the impression of the weightiness of the drawing's matter.*

*Because of the opportunity that the medium of oil paint offers (slow drying of the painted layer, possibility to make high paste on the painting), I have tried to transfer on the painting the sensation of thickness and weight of the matter related to the drawing, without giving the impression of rugged painting burdened by colours. As a solution a method of quicker painting was discovered, on several occasions and, I also used the palette knife that allows quick transfer of paint from one part of the painting to another. During the procedure of application and removing of the paint, palette knife would leave visible structure behind which, as a contrast to the high paste, contributed to the buildup of the rhythm on the surface of the painting.*

## Moćni Rendžeri

Okršaji Moćnih Rendžera (američka TV serija u Saban Entertainment produkciji, nastala 1993. godine, koja prati doživljaje grupe tinejdžera – superheroja, u borbi sa mračnim silama iz svemira), najčešće se odigravaju u nekom prostoru van grada, u zelenom krajoliku ili u stenovitim, opustošenim pejzažima napuštenih rudnika. Na kontrastu takve scenografije i njihovih svetlih, drečavih kostima u crvenoj, plavoj, zelenoj, žutoj i roze boji, bazira se ovaj rad.

Nekako je čudna potreba da oko traži intenzivne, zasićene boje kada se nađe pred lepim seoskim pejzažom. Tako je bilo i ovog puta u selu Jalovik, usred brdovite zapadne Srbije.

Čudna stvar, pomislih – ne mogu da se opustim u svoj toj pitomini, nedostaje mi TV, očekujem važan mejl, šta ima na Fejsu – samo malo... da se smirim...

Pitala sam Savu 1 (plavog Rendžera): „Kada se igrate rata, koje strane su u igri?“

„Igramo se Srba i Al Kaide!“, reče Sava i otrča u mrak sa svojim roze pištoljem izrezanim od stirodura. Hvala Milici, Nevenki, Mariji, Savi 1 i Savi 2.

#### RAD/WORK

„Močni Rendžeri”, serija od 3 fotografije, 42,5 x 30 cm svaka

“Power Rangers”, a collection of 3 photographs, 42,5 x 30 cm each

#### Power Rangers

*Clashes of Power Rangers (American TV show in Saban Entertainment production created in 1993 following the adventures of a group of teenage superheroes in their struggle with dark forces of the universe), usually takes place in some out of town space, in green area or rocky and deserted landscapes of deserted mines. My work is based on the contrast of such scenery and their bright screaming costumes in red, blue, green, yellow and pink colour.*

*It is somehow strange that need, that our eye betrays, to look for intensive, saturated colours when facing beautiful village landscape. This time it happened in the village of Jalovik, in the mist of hilly western Serbia.*

*Strange thing, I thought – I cannot relax in this quiet environment, I miss the TV, I am expecting important e-mail, what is new on the Face – I need some time... to relax.*

*I asked Sava 1 (the blue Ranger): “When you play war, who is fighting whom?”*

*“We play Serbs and Al-Qaeda!” says Sava and runs off into the dark with his pink gun cut out from styrodur.*

*Thanks to Milica, Nevenka, Marija, Sava 1 and Sava 2.*

Nisam htela da pođem a da ne znam šta bih radila, imala sam neki plan. I sada sam srećna što sam uspela da uradim to što sam želela ali isto tako znam da nisam propustila da osetim pokretačku energiju ljudi oko mene, prostora u kojem smo se nalazili, gde sam ponovo nešto novo naučila, osetila i dozvolila da se prepustim i vidim šta sve može da se desi.

## Moj prostor i Organski senzor biološkog polja\*

Ideja da biljke mogu da osećaju emocije baš kao i ljudi i životinje, zabeležena je prvi put 1848. godine kada je Fehner izložio tu ideju u svojoj knjizi *Nana*.

*Moj prostor* predstavlja otkucaje mog srca odštampane na paus papiru zajedno sa jednostavnom formom kuće.

*Organski senzor biološkog polja* predstavlja tri jednostavne biljke uz tekst ljubav–mržnja. Biljka u sredini je bez teksta. Ljudi, a verovatno i biljke, pod uticajem su spoljašnjeg i unutrašnjeg okruženja.

Htela sam da vidim kako se to može uporediti u dva različita dela.

### *My Space and Organic Biofield Sensor\**

*The notion that plants are capable of feeling emotions just like humans and animals, was first recorded in 1848 when Fechner suggested the idea in his book Nanna.*

*My Space display my own heartbeat printed on tracing paper together with a simple form of a house. Organic Biofield Sensor display three simple plants with the text Love–Hate. The plant in the middle is without any text. Humans, and possibly plants, are influenced by both external and internal environment. I want to see how this can be done in the two different works.*

Prvo što bi neko mogao pomisliti kada dođe u Jalovik bilo bi da je Jalovik napušteno mesto. U Jalovik se najčešće stiže sa nekom određenom namerom. Tuda se ne prolazi slučajno! Tu nema nervoze, mirno je, a istovremeno postoji pozitivna, prijateljska atmosfera. U pitanju je jedno naročito mesto! Poziv na Jalovičku likovnu koloniju bio je prilika da se suočim sa umetnošću na tom naročitom mestu, idealnom za crtanje!

Umetnost crtanja je jedno od važnijih polja moje umetničke prakse. Kroz obrazovanje, hronološki, naučio sam prvo osnovne tehnike crtanja, a potom sam spoznao da je crtanje najdirektniji način da se projektuje unutrašnja slika i najneposredniji način vizuelnog mišljenja. Na kraju sam shvatio da se umetnost crtanja nalazi u osnovi svakog drugog vizuelnog mišljenja, u bilo kom drugom vizuelnom mediju, i ne samo to, već da se umetnost crtanja nalazi u evolucijskom principu ljudske vrste uopšte!

Odlučio sam, zato, da se baš u Jaloviku suočim sa jednim specifičnim problemom u umetnosti crtanja. U pitanju je problem prenosa energije, problem uvećanja i transformacije. Zanimalo me je koje stanje svesti je neophodno i šta je sve potrebno da se dogodi da bi došlo do transformacije, od ideje, preko malog, u veliko, bez gubitka energije! Zanimalo me je, da li je bitno na kom mestu se to dešava, u kom vremenu, u kom času dana ili noći.

Jalovik je više od puke umetničke kolonije, Jalovik je eksperimentalna umetnička laboratorija!

*First thing that someone might think on arrival to Jalovik is that Jalovik is an abandoned village. One usually comes to Jalovik for some specific reason. You do not pass by it accidentally! There is no tension, it is peaceful, but at the same time there is a positive, friendly atmosphere. It is one special place! Invitation to Jalovik Art Colony was an opportunity for me to face the art in that special place, ideal for drawing!*

*The art of drawing is one of the most important fields of my artistic interest. Through education, chronologically, I first learned the basic techniques of drawing and then I realized that the drawing is the most direct way of projecting internal picture and the most direct way of visual thinking. In the end I realized that the art of drawing is the basis of every other visual thinking, in any other visual media, and not only that, but that the art of drawing is inherent in the evolutionary principle of the human race!*

*That is why I have decided to face, in Jalovik of all places, the specific problem in the art of painting. It is the problem of transfer of energy, problem of enlargement and transformation. I wanted to know what is the required level of awareness and what is needed to achieve transformation from idea, through small, to big, without the loss of energy! I wanted to know whether the place it is all happening in is important, or the importance of time, the time of day or night.*

*Jalovik is more than any other art colony, Jalovik is experimental art laboratory!*

## DEČJA RADIONICA/CHILDREN'S WORKSHOP

Najfiniji potezi dečjih ruku zabeleženi su letos u Jaloviku. Crteži, grafike, izvajane figure, oslikavaju kreativnost, trud, radost i razigranost članova Dečje likovne radionice. Stvaralaštvom, učenjem, ali i igrom, pretočili smo vreme u linije, boje, oblike, u osmehe i divna sećanja. Kolonija je ugostila četrdesetak drugara iz vrtića i iz osnovne škole. Uz savete nastavnika i umetnika iz Jalovičke likovne kolonije, vredno su stvarali iskrena, umiljata umetnička dela.

Ana Ilić i Darija Gordić Milinković,  
koordinatori Dečje radionice

*The finest strokes of children's hands were recorded this summer in Jalovik. The drawings, graphics, sculptures, depict the creativity, efforts, joy and playfulness of the members of the Children's Workshop. By means of creativity, learning, but also by means of play, we have transposed the time into lines, colours, shapes, smiles and wonderful feelings. Colony has hosted forty something buddies from the nursery and elementary school. Under the advices of teachers and artists from Jalovik Art Colony, they applied themselves diligently to create honest and dear works of art.*
